

Standards

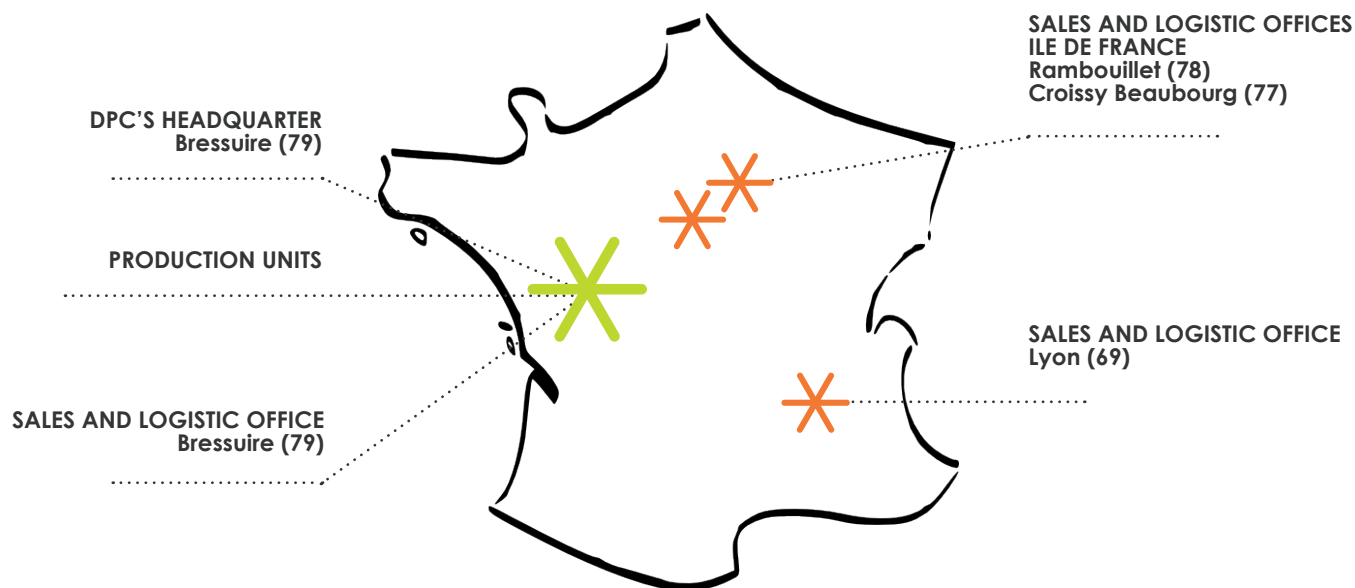

Our products meet the current standards requirements (NF EN 1729-1, NF EN 1729-2...) as well as «NF Education», «NF Collectivités», «NF Environnement» and PEFC.

The NF Environnement mark is the only official French eco-label. It is overseen by AFNOR Certification and is recognised by the Ministry for the Environment. It gathers 20 criteria and corresponds to a total step taking account the various stages of the life cycle of the products. To get the NF Environment ecolabel, you need to satisfy precise requirements. This mark is only applicable to good quality products and before it can be certified, the furniture has to comply with strict regulations.

The NF mark is a collective certification mark. It guarantees the quality and safety of the products and services certified. The NF mark assures compliance not only with current standards but also with additional quality criteria that meet consumer's needs. The products and their production sites as well as NF services are regularly checked. This is to ensure that you receive a constant level of quality.

PEFC is the world's largest forest certification system. PEFC works throughout the entire forest supply chain to promote good practice in the forest and to ensure that timber and non timber forest products are produced with respect for the highest ecological, social and ethical standards. Thanks to its eco-label, customers and consumers are able to identify products from sustainably managed forests.

All our products are manufactured in our 6 production units located in Bressuire, FRANCE. Each factory is specialised in wood, metal or both and can respond to any demand.

All our products have a 10 year warranty.
